

Evidence Packet Anatomy

Inside every Bright Data fetch wrapped by PROOFCHAIN

```
{
  "content":      "<scraped HTML or JSON>",
  "url":          "https://sec.gov/10-K/TSLA",
  "sha256_hash":  "a3f7b29c8d...e4f1c8d2",
  "timestamp":    "2026-05-30T15:00:00Z",
  "retrieval_method": "BRIGHT_DATA_SERP_API",
  "robots_txt_status": "allowed",
  "ed25519_signature": "9eebe2f126...83b3082dea01",
  "prev_hash":    "<hash of seq-1 packet>",
  "seq":          42
}
```

SHA-256 of content

Ed25519 signature

Hash-chain link

Tamper any field → signature fails. Mutate prev_hash → whole chain breaks downstream.
