

Three forces converging

Why agent-web provenance becomes regulatory infrastructure in 2026

1

Throwaway code

"Code is suddenly free, ephemeral, malleable, discardable after use"

— Andrej Karpathy, Sequoia 2026

"30% of apps on Vercel already come from agents"

— Guillermo Rauch, Vercel

When code disappears, evidence is what remains.

2

IETF web-bot-auth

draft-meunier-web-bot-auth-05
March 2026

Cloudflare + Google co-authored

Every AI bot gets Ed25519 keypair
RFC 9421 HTTP signing

Amazon, Cloudflare, Akamai, OpenAI
all aligned with the direction

No hash chain, no content evidence,
no compliance overlay → our space.

3

EU AI Act Article 12

Enforcement begins August 2026

6-month minimum log retention

€35M

or 7% of turnover — whichever higher

High-risk AI systems require
tamper-evident audit trails

Regulator-mandated infrastructure.
Non-optional, not opt-in.

PROOFCHAIN sits at the intersection of all three.
